

# **GDSC SOLUTION CHALLENGE**

## **BASIC IDEA OF PROJECT**

Project management: NGOs, schools, or other organizations working with underprivileged kids could create projects or initiatives directly on the app, specifying the type of support they need, and posting updates on the progress of the project.

Donations: The app could provide an option for users to make monetary donations to specific projects or initiatives, with the ability to track the impact of their donation. The app could also include a secure payment gateway to ensure safe and secure transactions.

Volunteering: Users interested in volunteering their time and skills could find opportunities to do so directly on the app, either as part of a specific project or through a more general volunteer program.

Communication and collaboration: The app could include features for users to connect and collaborate, such as direct messaging, group chat, and the ability to join or create groups based on shared interests and goals.

### **Additional Features**

We can ask the donor for a preference:

For example, the donor can mention if he would prefer his/her donation to go to a particular locality/group.

Then we can group the donors with similar preferences and enable an option for interaction among themselves.

Since many individuals usually hesitate to donate because they're not sure if the website is authorized and genuine, we can enable a feature where individuals can know where their money has been sent, and who all have benefited from it.

- 1) Money-tracking feature for customers
- 2) Interaction among similar kind of donors
- 3) Enabling group donations
- 4) Enabling a thank you note from the recipients after donation is successful
- 5) 100% transparency
- 6) Public display of the list of all donors so that they can trust the service  
(donors can specify if they want the amount to be visible to others)

### **Conclusion**

We are trying to create a win-win situation for society in which needy people get what they need and people and organizations who want to contribute can do that easily.

### **Finance Management**

5% of the monetary donations includes transport charges, and labor compensation(Initially)
